

Dauphin AS 365

The Aérospatiale AS 365 Dauphin, now built by Eurocopter, is a multi-role helicopter, twin engine, one of the fastest helicopters and successful medium-light modern French. It has a very elegant and streamlined fuselage and a rotor recessed into the tail, called Fenestron (window). With an average of over 320 km / h, a copy of this helicopter achieved a speed record in the Paris-London trip. Great for long distances even with unfavorable weather conditions.

Specifications:

- Cruising speed 287 km/h
- Autonomy 860 km
- Seats 7/8
